

# the **ALLIANCE** difference

## + DISCOVERY

The Alliance Team wants to learn about you. In this step we will go through a thorough evaluation, ask questions, communicate with your referring physician, therapist, family, and anyone else involved with your rehab. Often times the correct solution can come about when you ask the right questions.

**We want to ask the right questions.**

## + GOAL SETTING

One of our core beliefs is we think everyone can achieve goals. We want to come alongside you to help set a mobility/functional goal that resonates with you and the vision you have for your life. We believe that every device we provide is a tool to help you achieve your goals.

## + NEW NORMAL

Your current mobility restrictions do not define you. Whether due to limb loss, muscle weakness or instability, your road has been challenging. We believe no matter your diagnosis you still have VALUE AND WORTH, and can have an impactful life. Alliance is offering a partnership in mobility freedom to create a "new normal" that is fulfilling. Life may not be the same as it was, but it can still be great.

## + STRATEGIC FOLLOW-UP

Once we fit you with your device, that is not the end for us. We want to make sure not only is your device functioning as it should, but you are progressing towards achieving the goals we agreed upon. We hope that as you continue in your new normal, we will be a safe place to help you achieve the specific vision you have for your life.

## + GOAL DIGGER

"Goal Digger" is a term that has increased in popularity. At Alliance Prosthetics and Orthotics we define goal digger as an individual who has a clear vision of who they are, what they want to achieve, and has the tenacity to achieve it. We believe having a mindset of goal setting and achieving is valuable in your rehab, as well as in your life in general.
